ESAL44C×25	25	19
ESAL63B×20	20	35
ESAL63B×30	30	39

How To Use

Turn the handle to a desired position.

Press down the handle to engage the teeth with the locking element.

When the handle is released, the return spring automatically disengages the teeth again.

Feature

- Ergonomic design provides comfortable gripping.
- Safety design : unless the handle is pressed down, it does not work.

Note

Use in hot or highly humid circumstances can deteriorate the plastic material properties.

Technical Information

Working temperature : Between -30°C and 130°C
