

Quick Exchangeable Modular Parallels

Modular parallels, machinable jaws and multiple part clampings allow clamping any workpieces.

The self-locking mechanism allows sure installation and removal in one step.

Features

- The self-locking mechanism provides quick installation and removal, and it is reliable and safe.
- Reduces setup time and increases operating time of machines.
- Parallels are case hardened and precision grounded.

How To Use

Various parallels and jaws can be installed to Modular Vises (MVMF).
