## New additions to One Touch Fastener Lineup

### Compact Snap-In Clamps — the most compact model in the series — have been added to One Touch Fasteners!

Replace small-diameter bolts for quick, one touch fastening!

One Touch Fasteners are quick release fasteners for frequent changeover of machinery and fixture. Quick and easy tool-less clamping reduces setup time in changeover.

The newly added Compact Snap-In Clamps are ideal for applications where small bolts have been used due to limited space.

#### 1 Smallest in the series!

Clamping Pins

#### 2 Instantly clamped as the pin is inserted!

Simply lift the knob to unclamp.

#### 3 Perfect for space-limited applications!

Easy installation of clamping pins into M3 or M4 tapped holes — only the pin is installed on the base side, keeping the footprint minimal.
