

New additions to One Touch Fastener Lineup

Floating Receptacles

NEW

For Quarter-Turn Clamps / Heavy Duty Quarter-Turn Clamps

One Touch Fasteners are quick-release fasteners designed for frequent changeovers of machinery and fixtures. Tool-less clamping enables quick setup and reduces downtime.

Floating Receptacles are now available for Quarter-Turn Clamps and Heavy Duty Quarter-Turn Clamps. The floating mechanism expands the tolerance range for hole spacing and ensures secure mounting.

Key Point

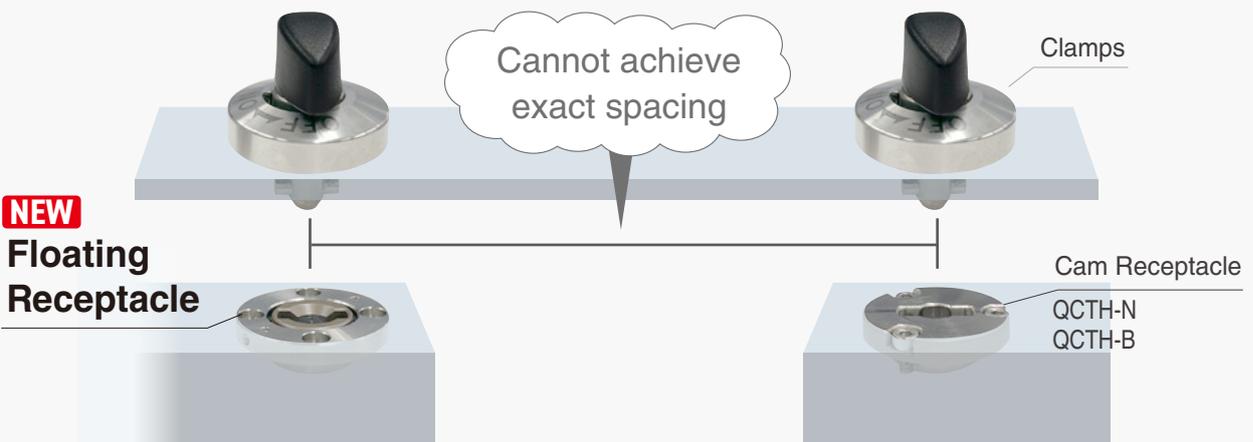

Built-in slider compensates for misalignment

For use with Quarter-Turn Clamps

For use with Heavy Duty Quarter-Turn Clamps

Ideal for Applications Where:

- Standard hole spacing cannot be achieved on an assembled base
 - Precise hole spacing is difficult to maintain on a welded frame
- Floating Receptacles compensate for misalignment and reduce costly rework.
