NEW PRODUCTS

Launched in September 2026

New Products Added to the One Touch Fastener Lineup

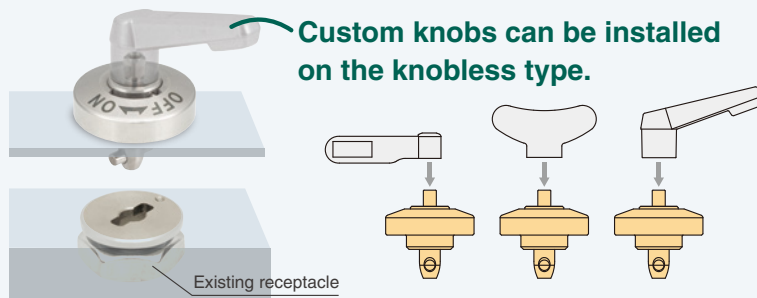

One Touch Fasteners are quick-release fasteners for frequent changeover of machinery and fixtures, replacing conventional screw tightening with one-touch clamping.

Quick, tool-less clamping reduces setup time while ensuring consistent clamping force and secure fastening, making them ideal for improving changeover efficiency.

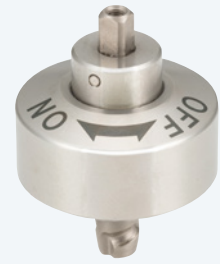

NEW

Introducing the New **Knobless** Type for Quarter-Turn Clamps

The new knobless type accepts customer-supplied knobs or levers, allowing you to choose the operating style that best suits your application.

Knobless Quarter-Turn Clamps
Clamping Force: 60, 90N

Knobless Heavy-Duty Quarter-Turn Clamps
Clamping Force: 250, 400N

Ideal for Applications Where:

- ✓ Operation is required in tight or hard-to-reach spaces.
- ✓ Lower operating force is preferred.
- ✓ A custom knob or lever can improve grip and ease of operation.

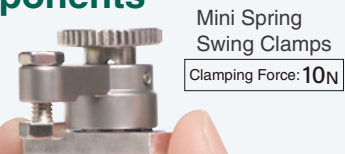

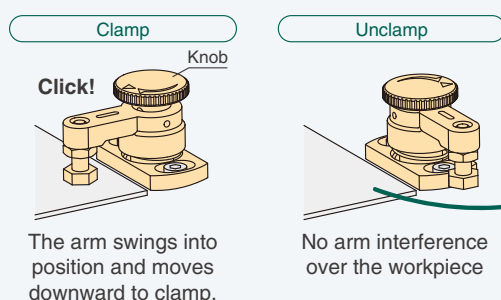

New Addition to the Spring Clamp Lineup

Imao Spring Clamps are mechanical tool-less clamps that provide a constant clamping force through spring pressure.

NEW

New Mini Spring Swing Clamps – The Smallest in the Series Ideal for Clamping Small PCBs and Electronic Components

Simply rotate the knob half a turn to swing the arm to the clamping or unclamping position. Spring-loaded clamping ensures a consistent clamping force regardless of the operator. A distinct click confirms when clamping is complete, helping prevent incomplete clamping.

Mini Spring Swing Clamps
Clamping Force: 10N
